DETAILED ACTION

Priority

Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 120 as follows: There may be a typographical error with regard to the priority claim to U.S. Patent Application No. 09/954,647. It appears as if Applicant intends to claim priority to U.S. Patent Application No. 09/594,647.

An application in which the benefits of an earlier application are desired must contain a specific reference to the prior application(s) in the first sentence of the specification or in an application data sheet (37 CFR 1.78(a)(2) and (a)(5)). The specific reference to any prior nonprovisional application must include the relationship (i.e., continuation, divisional, or continuation-in-part) between the applications except when the reference is to a prior application of a CPA assigned the same application number. Also, the current status of all nonprovisional parent applications referenced should be included.

If the application is a utility or plant application filed under 35 U.S.C. 111(a) on or after November 29, 2000, the specific reference to the prior application must be submitted during the pendency of the application and within the later of four months from the actual filing date of the application or sixteen months from the filing date of the prior application. If the application is a utility or plant application which entered the national stage from an international application filed on or after November 29, 2000, after compliance with 35 U.S.C. 371, the specific reference must be submitted during the pendency of the application and within the later of four months from the date on which the national stage commenced under 35 U.S.C. 371(b) or (f) or sixteen

Art Unit: 1623

months from the filing date of the prior application. See 37 CFR 1.78(a)(2)(ii) and (a)(5)(ii). This time period is not extendable and a failure to submit the reference required by 35 U.S.C. 119(e) and/or 120, where applicable, within this time period is considered a waiver of any benefit of such prior application(s) under 35 U.S.C. 119(e), 120, 121 and 365(c). A priority claim filed after the required time period may be accepted if it is accompanied by a grantable petition to accept an unintentionally delayed claim for priority under 35 U.S.C. 119(e), 120, 121 and 365(c). The petition must be accompanied by (1) the reference required by 35 U.S.C. 120 or 119(e) and 37 CFR 1.78(a)(2) or (a)(5) to the prior application (unless previously submitted), (2) a surcharge under 37 CFR 1.17(t), and (3) a statement that the entire delay between the date the claim was due under 37 CFR 1.78(a)(2) or (a)(5) and the date the claim was filed was unintentional. The Director may require additional information where there is a question whether the delay was unintentional. The petition should be addressed to: Mail Stop Petition, Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450.

Appropriate correction is required.

Oath/Declaration

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because: There may be a typographical error with regard to the priority claim to U.S. Patent Application No. 09/954,647. It appears as if Applicant intends to claim priority to U.S. Patent Application No. 09/594,647.

Statutory Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claim 1 is rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1 and 2 of prior U.S. Patent No. 6,509,320. This is a double patenting rejection.

Non-Statutory Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-4 of U.S. Patent No. 6,479,463 ('463). Although

Art Unit: 1623

the conflicting claims are not identical, they are not patentably distinct from each other because the genus of compounds claimed in the '463 patent are all inclusive of the broad genus of compounds claimed in the present application.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by patent US 5,248,672 to TOWNSEND et al. (A).

TOWNSEND teaches polysubstituted benzimidazole nucleosides, such as 1-(2,3,5-tri-O-acetyl- β -D-ribofuranosyl)-2,4,6-trichlorobenzimidazole (column 9, line 38 to column 10, line 7) and 2-chloro-4,5-dibromo-1-(2,3,5-tri-O-acetyl- β -D-ribofuranosyl)-benzimidazole (column 10, line 56 to column 11, line 9). These compounds anticipate the generic nucleoside compounds of claim 1.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by patent US 5,424,295 to KRENITSKY et al. (B).

KRENITSKY (B) teaches 9- β -D-arabinofuranosyl-2-amino-6-methoxy-9H-purine analogs. See abstract. In column 3, line 59 to column 4, line 11, KRENITSKY (B) discloses the mono-, di- or tri-esters of the arabino-sugar residue substituted at the 2', 3' and 5'-positions.

Art Unit: 1623

Preferred esters include "carboxylic acid esters in which the non-carbonyl moiety of the ester grouping is selected from straight or branched alkyl (e.g. n-propyl, t-butyl, n-butyl), ... amino acid esters (e.g. Gly, Ala, Leu, Ile, Phe, Tyr and Trp) and other natural occurring amino acid esters" The compounds of KRENITSKY anticipate the nucleoside compounds of claim 1.

The art is replete with further references published prior to October 16, 1996 directed to ester and amino acid prodrugs of purine derivatives within the scope of claim 1 for which it can be rejected under 35 U.S.C. 102(b) as being anticipated. Further examples of anticipatory prior art include patent US 5,492,897 to KRENITSKY et al. (C) and international patent publications WO 92/16215 A1 to AVERETT et al. (N) and WO 94/17090 A1 to GREGSON et al. (O).

Conclusion

Claim 1 is pending. Claim 1 is rejected. No claims are allowed.
